PERSONAL STATEMENT

| | |
|---------------|-------------------------------|
| Full Name | Thevindu Nimeth Dehigaspitiya |
| Date of Birth | 09-05-2000 |
| Age | 25 |
| Nationality | Sri Lankan |
| Gender | Male |

I'm a dedicated full-stack developer skilled in building modern, scalable web applications from front to back. On the frontend, I craft responsive and user-friendly interfaces using React, Tailwind CSS, and TypeScript. On the backend, I work with Next.js, Node.js, and PostgreSQL to create efficient APIs and robust server-side logic.

I've successfully delivered projects with features like authentication, dynamic routing, dashboard systems, and cloud deployment via Vercel or Netlify. I also rely on Git for version control and follow best practices to write clean, maintainable code.

EDUCATION

B.ENG (HONS) SOFTWARE ENGINEERING

IIC University of Technology, Cambodia

2021 - Present

GCE Ordinary Level, GCE Advanced Level

Isipathana College, Colombo

2011 - 2019

WORK EXPERIENCE

While pursuing my degree, I have undertaken software projects for real clients, which has provided me with practical experience in the field. I have gained one year of experience in this capacity, which has enabled me to further develop my skills and knowledge.

Quality Assurance Technician - Global System Solutions (Pvt) Ltd (Full Time)

2023 Dec - 2024 Jun

- Worked as a Quality Assurance Technician while pursuing my degree to gain hands-on industry experience and develop team collaboration skills
- Tested product functionality to ensure quality and performance standards were met
- Identified and reported bugs and usability issues across multiple platforms
- Collaborated with developers and product teams to maintain high-quality standards

PROJECTS

Invoice Management Dashboard [GitHub](#) [Web](#)

Developed an Invoice management system dashboard designed with scalability, performance, and security in mind, the dashboard empowers users to create, manage, and track invoices and customers with ease. This dashboard allows user-friendly navigation to simply navigate through the website, implement a robust login and signup functionality powered by NextAuth to ensure data protection, complete CRUD operations functionality and many more.

- **Languages, Frameworks & Tools** : Next.js, TypeScript, Tailwind CSS, PostgreSQL, Vercel
- **Platform** : Web

YC Directory - Pitch Startup Website [GitHub](#) [Web](#)

YC Directory is a modern platform designed to showcase and discover innovative startup ideas, empowering founders to pitch, share, and gain visibility in a fast-paced tech ecosystem. Startups and creators can effortlessly publish rich, structured pitches through a Sanity.io-powered CMS. With Sentry.io integrated for real-time error tracking and monitoring, the platform ensures high reliability and a smooth experience for all users.

- **Languages, Frameworks & Tools** : Next.js, TypeScript, Sanity.io, Sentry.io, Vercel
- **Platform** : Web

Travel With Thevindu - Travel Booking Platform [GitHub](#) [Web](#)

This booking web application is designed for travelers who love vacations, providing a seamless and enjoyable travel experience with a range of features that support user interactions. Users can explore various locations, read blogs, and book vacations. A Fully responsive website to ensure a consistent experience across all device types.

- **Languages, Frameworks & Tools** : React.js, JavaScript, Tailwind CSS, AOS, Netlify
